the changing definition of masculinity is an outgrowth of four years of developing and teaching the course social factors in male personality at ohio state university columbus this volume reflects in addition to my thoughts and

feelings about what should be discussed in a sex roles course taught from a male perspective the thoughts feelings and knowledge of scores of students colleagues and friends these are persons who either have taken the course or discussed with me appropriate material to be included in such a course and or book chapter 1 for example is influenced greatly by the work of eliza beth and joseph pleck's the american man dealing with the periods of masculinity in the united states up to 1965 the chapter also deals with emerging meanings of masculinity after 1965 and female and male responses to these meanings the second chapter is devoted to male sex role socialization and examines the roles of biology and environment in male socialization it is also concerned with agents of male socialization and with male assumption of such sex role traits as dominance competitiveness the work ethic and violence in chapter 2 i also propose two general masculine roles frequently assumed by american males which may or may not be race specific the white masculine role and the black masculine role

as gender norms have changed over the decades the definition of masculinity has evolved leading to some confusion unmet expectations and an unknown future today's man can feel comfortable displaying emotion and empathy does this shift mean that the role of man is no longer dominant in our society is there an inevitable path to irrelevance the diverging viewpoints in this thought provoking resource will challenge readers assumptions about gender roles and ask them to consider how those roles will evolve as the century progresses publisher's description

against all evidence to the contrary american men have come to believe that the world is tilted economically socially politically against them a majority of men across the political spectrum feel that they face some amount of discrimination because of their sex the authors of gender threat look at what reasoning lies behind their belief and how they respond to it many feel that there is a limited set of socially accepted ways for men to express their gender identity and when circumstances make it difficult or impossible for them to do so they search for another outlet to compensate sometimes these behaviors are socially positive such as placing a greater emphasis on fatherhood but other times they can be maladaptive as in the case of increased sexual harassment at work these trends have emerged notably since the great recession of 2008-09 drawing on multiple data sources the authors find that the specter of threats to their gender identity has important implications for men's behavior importantly younger men are more likely to turn to nontraditional compensatory behaviors such as increased involvement in

cooking parenting and community leadership suggesting that the conception of masculinity is likely to change in the decades to come

the current emphasis in research and education on women and girls is fraught with problems it has raised a concern that boys and men should be included in research and intervention work on gender equality and transformation as a result academics with a background of many years of work in women s and gender studies undertook a research project focusing on the construction of masculinities among young men from boys to men was born out of this project this highly original work arises from the conference from boys to men held in january 2005 it represents the work of some of the best known theorists and researchers in masculinities and feminism in south africa on the continent and internationally the subjects covered are based on rich ethnographic studies mostly in south africa but also elsewhere in africa acknowledging that there are multiple versions of masculinity and that some are more valued than others this book is concerned with documenting both hegemonic discourses on masculinity as well as resistances and challenges to dominant forms of being a boy or man in different contexts of space and time from boys to men provides valuable material for those working with issues of gender identity and power and will sharpen understanding of males inform community based interventions and facilitate theory building this impressive collection of research on men boys and masculinities would have been impossible just a generation ago it took the worldwide impact of the women s liberation movement and the many feminisms that have since developed to bring gender into focus and to bring men into focus as participants in a gender system raewyn connell professor at the university of sydney author of masculinities 1995 given the extant paucity of research and literature on masculinities this book will undoubtedly prove to be an invaluable resource for scholars in the field of gender studies the editors of the volume should be commended for this timely well constructed and significant contribution to the literature on masculinities studies both in south africa and internationally norman duncan chair of psychology university of the witwatersrand setting this collection apart from existing scholarship on masculinities in south africa is its interrogation of the gendered rhetoric of boyhood and manhood in the context of hiv aids this is a multilayered and rich collection that suggests masculinities have the potential to be unmade and remade the volume usefully opens up new avenues of analysis telling us that masculinities are always in process under negotiation contradictory for ever in crisis vasu reddy gender and development unit human sciences research
