It explains the six elements of the play cycle: pre cue, play cue, play, return, play frame, flow, and annihilation, and shows how practitioners can use this to guide their interventions. Building on the author's research and including an updated and revised theory of the play cycle, the book applies the play cycle to key aspects of provision alongside examples from a wide range of settings. Chapters cover the indoor and outdoor environment and resources, child-led and non-directive play, including risk, the adult role, play maintenance, and interventions. The play cycle and play cycle observation method are discussed in policy and practice, including vignettes and reflective questions. This text brings the theory and application of the play cycle fully up to date and is essential reading for practitioners and those studying play-related courses, for example playwork, childcare, and early years education.
